

Project Datasheet

Project Saipem/ZOHR-RUP Project

Scope Transportation & installation of umbilical

1. Project Overview

Zohr Gas field is located within the Shorouk Block, within the Egyptian Exclusive Economic Zone, in the Mediterranean Sea. The field is situated more than 150km from the coast.

2. Scope of Work

Saipem involved Blue Offshore in 2017-2018 for an earlier phase of the Zohr project. Now Saipem contracted Blue Offshore for the lease of the BC01 basket carousel system related to the ramp-up phase of the Zohr field development. The basket carousel system was used for the transportation and installation of 3,850Te of offshore umbilical, including terminations. The offshore installation was carried out in Q1 2019 onboard Normand Maximus.

Besides the rental equipment, Blue Offshore also provided project management, engineering and preparation of the basket carousel spread, as well as technical assistance on board Normand Maximus during transpooling operations in Norway and offshore operations in Egypt.

3. Timing

The project duration was from November 2018 to April 2019.
